

## Functional Requirements

### **FR1 – List Movies**

The system shall display a list of all movies currently playing in the cinema.

### **FR2 – List Shows**

The system shall allow the customer to select a movie and shall display all available shows for that movie, including the screen number and start time.

### **FR3 – Display Seat Layout**

The system shall display the seat layout for the selected show and shall indicate the status of each seat as either AVAILABLE or BOOKED.

### **FR4 – Book Seats**

The system shall allow the customer to select and book one or more available seats for a selected show. If a selected seat is already booked, the system shall reject the booking request for that seat and shall not change its existing status.

### **FR5 – Calculate Booking Price**

The system shall calculate the total booking amount based on the type of each selected seat. The price shall be ₹150 for SILVER seats, ₹250 for GOLD seats, and ₹400 for PLATINUM seats.

### **FR6 – Process Payment**

The system shall allow the customer to make payment using UPI, Card, or Cash. The booking shall be confirmed only if the payment is successful. If the payment fails, the booking shall not be confirmed and the selected seats shall be released.

### **FR7 – Print Ticket**

After a successful booking, the system shall print a ticket containing the booking ID, movie name, screen number, show time, booked seat numbers, and total booking amount.

### **FR8 – Cancel Booking**

The system shall allow the customer to cancel an existing confirmed booking using its booking ID. After successful cancellation, all seats associated with that booking shall become AVAILABLE again.
